

Congress evaluation Form summary

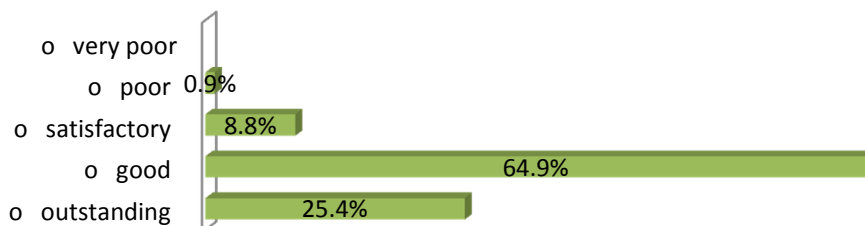

Congress center & lecture hall

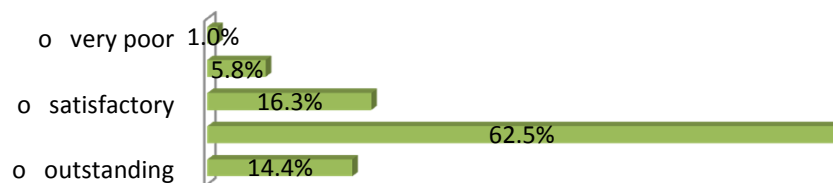

Printed Matter

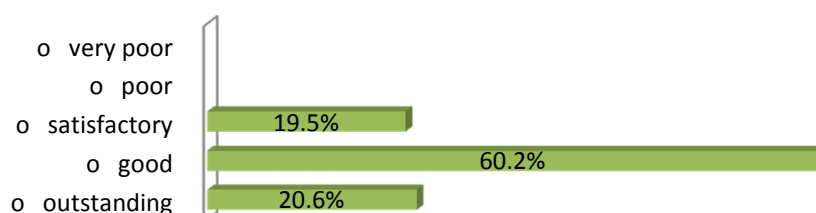

On-site registration procedure

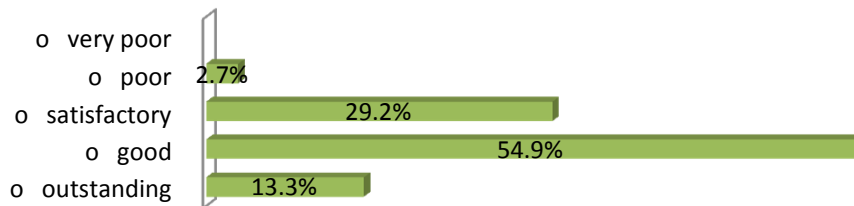

Friendliness of LSGE website

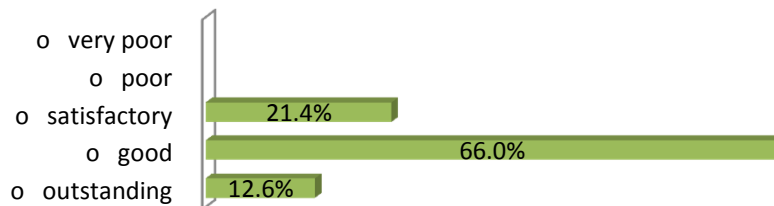

Selection of topics & speakers

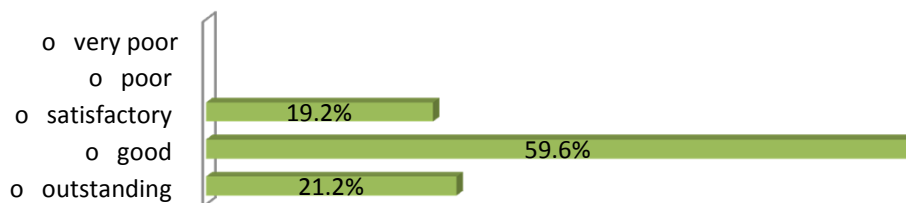

Quality of discussion & interactions

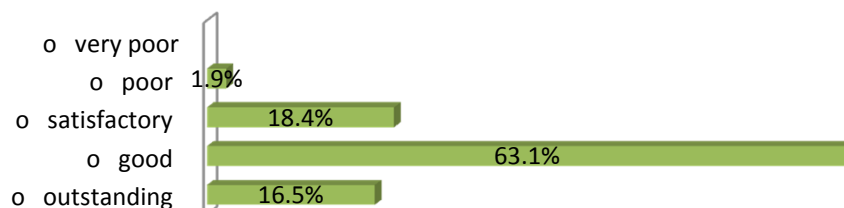

Level of knowledge gained

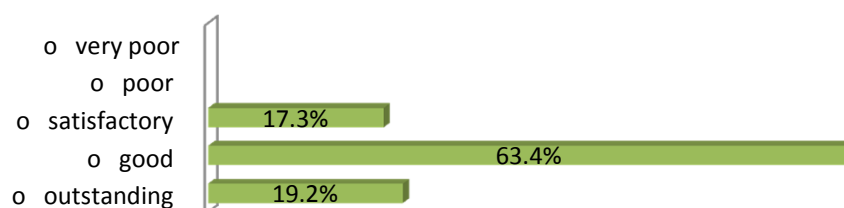

Presentation of the lectures

Time management of scientific sessions

Satisfaction w LSGE 2012 overall

COMMENTS:

French slides and printed matter (x5)

More interactive sessions needed (x3)

Some talks seemed like self promotion, otherwise excellent

CME credits needed on the certificate of attendance (x2)

Suggest Saturday and Sunday for better attendance (x3)

Suggest Saturday and Sunday for less traffic jams

Starting at 10 am for the periphery MDs (x4)

Keep it 1.5 day but add case-based discussions

We need interactive conferences with 2 speakers at same time

Involve live demonstrations of endos + more international speakers

Live endoscopy

Better than other meetings, need better printed material

Very interesting topics but long sessions

It's nice to have an interesting congress like this, I suggest 3 days to cover more topics

Needed more time and more lectures

More talks about upper GI bleeding and lower GI bleeding

Needed workshop for gastro & colono

Better venue needed

Include venues out of Beirut

Too much English spoken, I don't understand

Suggest the congress be FRI afternoon and SAT all day
